Changing EVERYTHING you thought you knew about STIG & CIS Compliance

ConfigOS is a critical software tool to help you sell and support your technology in Government environments

- Simplifies developing, deploying, and supporting applications in a security-compliant environment
- Hardens STIG & CIS controls around your application in 60 minutes
- Requires no clients/agents, databases, or web servers
- Automates integration with Government IA systems
- Implemented throughout the DoD and Civilian agencies in classified/unclassified, virtual and cloud infrastructures

Driving Success with Government Customers!
